The material on Banach spaces and their duals includes the Hahn–Banach theorem, the Krein–Milman theorem, and results based on the Baire category theorem, before culminating in a proof of sequential weak compactness in reflexive spaces. TITLE : **COST-BENEFIT ANALYSIS**
EDITION : 6TH EDITION
AUTHOR : E.J. MISHAN AND EUSTON QUAH
ISBN : 9781138492752

Cost-benefit analysis (CBA) is the systematic and analytical process of comparing benefits and costs in evaluating the desirability of a project or programme – often of a social nature. It attempts to answer such questions as whether a proposed project is worthwhile, the optimal scale of a proposed project, and the relevant constraints. CBA is fundamental to government decision making and is established as a formal technique for making informed decisions on the use of society's scarce resources. This timely 6th edition of the classic *Cost-Benefit Analysis* text continues to build on the successful approach of previous editions, with lucid explanation of key ideas, simple but effective expository short chapters, and an appendix on various useful statistical and mathematical concepts and derivatives. The book examines important developments in the discipline, with relevant examples and illustrations as well as new and expanded chapters which build upon standard materials on CBA.

The phenomenal growth of Islamic finance in the last few decades has been accompanied by a host of interesting questions and challenges. One of the critical challenges is how Islamic financial institutions can be motivated to participate in the 'equity-like' profit-and-loss sharing (PLS) contracts. It is observed that Islamic banks are reluctant to participate in the pure PLS scheme which is manifested by the rising concentration of investment on *murabaha* or mark-up financing. This phenomenon has been the hotbed of academic criticism on the contemporary practice of Islamic banking. This book explains the '*murabaha syndrome*' in light of the incentive provided by the current institutional framework and what are the changes required in the governance structure to mend this anomaly.
